

# Visit Activities Summary

Dominik Konrad Rybka

14th - 29th June 2003

## Plans before visit:

- Preparations of cameras radiation tests in Linac II tunnel.
- Preparations of FPGA radiation tests in Linac II tunnel.

## Realisation:

- Starting up the ELHEP Video Server, which takes picture from cameras in LINAC II tunnel. System described in attached document.
- Preparations of test system (hardware and software) for FPGA radiation experiment in LINAC II tunnel.
- Participation in the courses about safety procedures for LINAC II and TESLA accelerators.
- Taking part in DOOCS tutorial.
- Learning how DOOCS system works in real experiments, especially communication between VME bus and Device Server.
